**Subject:** Heads Up: Bluetec Testing  
**Date:** 02/19/2008 08:11 AM

---

FYI:

I have requested the FTP, HFET and US 06 testing of the Mercedes MBX/ GL 320 BLUETEC (SCR Technology) scheduled for availability at our lab 13 March.

This vehicle meets T2 Bin 5/ LEV-II ULEV standards.

**VERIFY gave this error message:**

"There was an error connecting to LOD. The Verify administrators have been notified. They will correct the error and complete the data transfer to LOD. STAR Transfer Error Message: Cannot find evaporative system data in CFEIS."

**Note to Sandra: Does this delay test scheduling? Is there anything for us CISD or LOD to do at this time?**

**This is a diesel so there is no evaporative emissions.**

Regards,  
Russ Banush
